Hi,

I have played Holdem on Canber for some time now, and it's a good point to start. You'll find here many low level poker players. So if you are new in poker I suggest starting from here.

Take care - and see y at WSP

I'll try downloading the application to see if it's different from the instant games. They have some good promotion and bonuses but I think this casino is an average one.

Try it if you want a casino that has a sportbook and poker background.
